

Action plan submitted by Seyitaliler Atatürk Ortaokulu for Seyitaliler Atatürk Ortaokulu - 23.01.2023 @ 22:41:20

By submitting your completed Assessment Form to the eSafety Label portal you have taken an important step towards analysing the status of eSafety in your school. Congratulations! Please read through your Action Plan carefully to see what you can do to improve eSafety further in your school. The Action Plan offers useful advice and comments, broken down into 3 key areas: infrastructure, policy and practice.

Infrastructure

Technical security

- › Your school system is protected by a firewall. Ensure that the provision and management of the firewall are regularly reviewed and updated, as and when required.
- › An educational approach and building resilience in pupils of all ages is also key to safe and responsible online use so bring together all teachers to have a discussion on how they will talk to their pupils about being a good and safe digital citizen. See www.europa.eu/youth/EU_en for examples of discussions that can take place in the classroom on this topic, through role-play and group games.

Pupil and staff access to technology

- › It is good that in your school computer labs can easily be booked. Consider the option of integrating other digital devices into the lessons as using them provides best practise for pupils in dealing with new media. Ensure that safety issues are also discussed.
- › The fact that staff and pupils are allowed to use USB memory sticks in your school following permission, would require that all staff concerned receive adequate training to be able to know when they can be used safely. Is this the case? To keep your systems secure whilst allowing staff and pupils you also need to include the ground rules in your Acceptable Use Policy. Check the fact sheet on Use of removable devices at www.esafetylabel.eu/group/community/use-of-removable-devices to make sure you cover all security aspects.

Data protection

- › It is good that all users are attributed a different password by the system in your school. Remind all school members never to write their given password down anywhere, certainly not on a sticker on a computer! Also, ensure that the Acceptable Use Policy reminds staff and pupils to keep their passwords secure and not share them with others.
- › It is good that your school provides training materials on the importance of protecting devices, especially portable ones. Please consider sharing those with others through the in . Also ensure that your materials are regularly reviewed to ensure they are in line with the state of the latest technology.

- › You have a good policy of keeping your learning and administration environments separate. It is good to ensure that staff training on managing these environments is up to date as you continue to review your policies. Share your policy with other eSafety Label users by uploading it to your school profile.

Software licensing

- › It is good that you can produce an overview of installed software and their licences in a short time frame with the help of several people. Consider centralising this.

IT Management

- › It is good that staff members with questions about software issues can contact a school helpdesk. Consider whether you need to provide training and/or guidance to new software that is installed on school computers. This is important to ensure that school members will take advantage of new features, but also that they are aware of relevant security and data protection issues.
- › It is good practice to ensure that the person in charge of the ICT network is fully informed of what software is on school-owned hardware and this should be clearly indicated in the School Policy and the Acceptable Use Policy. The person responsible for the network needs to be able to guarantee conformity with licensing requirements and that new software won't interfere with network operation.

Policy

Acceptable Use Policy (AUP)

- › It is good practise that whenever changes are put into place in your school, the school policies are revised if needed. Note though, that also changes outside the school can affect policies such as new legislations or changing technologies. Therefore please review your policies at least annually.

Reporting and Incident-Handling

- › Are all staff familiar with the procedure for dealing with material that could potentially be illegal? Is there a named person from the school senior leadership team who takes overall responsibility in this type of case? The procedure needs to be clearly communicated to all staff in the School Policy, and to staff and pupils in the Acceptable Use Policy. Remember to report and suspected illegal content to your national INHOPE hotline (www.inhope.org).
- › It is a pity not to share the details and solutions applied to bullying incidents both with the staff members and via the eSafety Label incident handling form. Only in this way can you learn through experience and the successful incident handling practices of others. You should also make sure that anti-bullying guidelines are given to pupils and staff in your Acceptable Use Policy.
- › Consider making the policy on 'Online incidents that take place outside school' more explicit and ensure that it is clearly communicated to all through the School Policy and the Acceptable Use Policy. Don't forget to anonymously document incidents on the Incident handling form (www.esafetylabel.eu/group/teacher/incident-handling), as this enables schools to share and learn from each other's strategies.

Staff policy

- It is good practice that the school policy includes information about risks with potentially non-secured devices, such as smartphones and that reference is made to it. Consider sharing your school policy via the uploading evidence tool, also accessible through the [My school area](#).

Pupil practice/behaviour

- Your school partly has a school wide approach of positive and negative consequences for pupil behaviour. This is a good start, make sure that the policy and associated hierarchy applies to all on- and offline issues and is shared widely and re-visited by all staff and pupils at least annually.

School presence online

- Regularly check the content of the school's online presence on social media sites to ensure that there are no inappropriate comments. Set up a process for keeping the site/page up to date, and check the fact sheet on Schools on social networks (www.esafetylabel.eu/group/community/schools-on-social-networks) for further information to make sure that good practice guidelines have been followed. Get feedback from stakeholders about how useful the profile is.
- Check the fact sheet on Taking and publishing photos and videos at school (www.esafetylabel.eu/group/community/taking-and-publishing-photos-and-videos-at-school) to see that your School Policy covers all areas, then upload this section of your School Policy to your profile page via your [My school area](#) so that other schools can learn from your good practice.
- It is good that pupils can give feedback on the school's online presence. Think about creating a space that is entirely managed by pupils. It's a great opportunity to learn about media literacy and related issues. It also can help to establish a peer network of support. Find out more about in the eSafety Label fact sheet.
- You have a dedicated person to monitor your school's online reputation, and this is good practice. Always be aware of any new sites that may not be immediately apparent through a regular search. Keep up to date with the latest sites and monitor these periodically, as they can be particularly damaging for schools and their pupils and staff if they present a negative viewpoint.

Practice

Management of eSafety

- Consider appointing a governor or board member who provides a liaison for eSafety issues. Consider also reporting on the number and type of eSafety incidents to the governing body on an annual basis when you also review your School Policy. See our fact sheet on School Policy www.esafetylabel.eu/group/community/school-policy.
- It is good that all staff in your school are responsible for eSafety. However, it is good practice to appoint a person who will have overall responsibility for eSafety issues to provide the focus needed. Ideally this should be someone from the senior leadership team. Ensure that this person is involved in the development and regular

review of your School Policy. She or he should not only be informed, but should also fill out the Incident handling form whenever an incident arises at www.esafetylabel.eu/group/teacher/incident-handling.

eSafety in the curriculum

- › Ensure that the eSafety curriculum keeps up with emerging issues by making full use of all available resources and ensure that it builds on prior learning, bearing in mind that pupils will need different messages depending on how they are using the technology.
- › It is excellent that consequences of online actions are discussed with pupils in all grades. Terms and conditions need to be read to fully understand contractual conditions. This can also concern aspects of data privacy. Another important topic is breach of copyright. Please share the materials used through the uploading evidence tool, accessible also via the [My school area](#).

Extra curricular activities

- › Use Safer Internet Day as a mechanism to get the whole school community involved with online safety. The information and resources available at www.saferinternetday.org offer an ideal opportunity to promote peer advocacy activities.
- › Consider carrying out a simple survey in order to establish what pupils are doing when they go online. This will help to inform eSafety education within the school. Share your survey questionnaire and results in the eSafety Label community via your [My school area](#) (avoiding publishing any personal information) so that other schools can benefit from your work and even share their results with you for comparative purposes.

Sources of support

- › Dobro je, da staršem nudite podporo v zvezi z e-varnostjo, ko si to želijo. Premislite, ali bi bilo dobro vse starše redno obveščati prek spletne strani ali prek povezav v šolskem e-glasilu. Morda imate lahko tudi roditeljski sestanek. Poglejte si smernice o informacijah za starše na www.esafetylabel.eu/group/community/information-for-parents, kjer boste našli gradiva, ki jih lahko posredujete staršem, in ideje, ki jih lahko uporabite na roditeljskih sestankih.
- › It is good that there is an informal network of 'eSafety expert' pupils in your school. Explore ways to strengthen this, maybe through optional courses and/or school rewards on eSafety topics or similar.

Staff training

- › In your school knowledge exchange between staff members is encouraged. This is beneficiary to the whole school. Upload PowerPoints, documents or similar of knowledge exchanges on eSafety topics via the uploading evidence tool, accessible also via the [My school area](#).
- › It is important that teachers are aware on the technology used by pupils in their freetime. This is important as this awareness is the first step in addressing the issue of powering down for school. At the same time pupils should not be asked to do their homework using technology not available to them outside of schools. Ensure that all teachers are provided with information of this. Have a look at the [Essie Survey of ICT in schools](#).

The Assessment Form you submitted is generated from a large pool of questions. It is also useful for us to know if you are improving eSafety in areas not mentioned in the questionnaire. You can upload evidence of such changes via the [Upload evidence](#) on the [My school area](#) section of the eSafety Portal. Remember, the completion of the Assessment Form is just one part of the Accreditation Process, because the upload of evidence, your exchanges with others via the [Forum](#), and your [reporting of incidents](#) on the template provided are all also taken into account.
